Regency Takes its Contemporary Collection Fireplace Outdoors

Adding modern warmth to outdoor living

DELTA, British Columbia (June 2, 2010) – Homeowners are investing more on their outdoor living spaces than ever before; that is why Regency Fireplace Products is responding with the introduction of the *Regency Horizon* TM Outdoor Fireplace. Inspired by the success of the popular Contemporary Collection, the *HZO42* now allows homeowners to enjoy all the convenience and ambiance of a Regency Gas Fireplace in an outdoor setting. They have combined the sleek and modern style of their top selling unit with the durability to withstand the elements using weather resistant components and high–grade stainless steel construction.

The louverless design features clean lines which frame an open front to display a panoramic view of dramatic wide angle flames; further enhanced by the reflective stainless steel body. Firebed accessories include reflective copper crystals, ceramic garden stones, river pebbles, or a coastal driftwood log set; all adding drama to the dancing flames of an open fire. This fireplace generates 44,500 BTUs of heat creating a warm gathering place in front of the fire during the cooler nights of Spring and Fall.

The flexibility of installation allows for unlimited design possibilities to compliment the landscape of any backyard or patio. This fireplace is completely vent free and does not require a chimney; available for both natural gas or propane applications. Whether you are building a new home in the suburbs or remodeling an urban deck or patio, outdoor fireplaces are no longer limited to high end luxury homes.

Like all Regency products, the Horizon *HZO42* is crafted from the highest quality materials and durable construction. Homeowners can be confident that their Regency Fireplace will provide years of enjoyment. For more information, including an online Fireplace Design Center, and to locate your local Regency Dealer, visit www.regency-fire.com.
