FPI to Market Revolutionary Pellet Technology *Dell-Point multi-fuel stove is the first of its kind on the market*

DELTA, British Columbia (August 28, 2005) – FPI Fireplace Products International Ltd. (FPI) is pleased to announce that it has entered into an exclusive licensing agreement with Dell-Point Technologies Inc. for FPI to manufacture and distribute residential heating products using patented Dell-Point multi-fuel technology throughout North America and select international markets. This technology has the ability to slash home heating costs while safeguarding the environment.

The Dell-Point greenfire™ technology is a patented, revolutionary system that burns natural fuels like wood pellets, corn and wheat in a reliable way with incredible 86% efficiency. The first product with greenfire™ technology is the Dell-Point Europa 75 multi-fuel stove. The Europa is certified by the US Environmental Protection Agency (EPA) and produces the lowest smoke emissions ever tested. The Europa 75 has tremendous potential to replace expensive, imported fossil fuels with renewable, affordable, domestic fuels.

About FPI Fireplace Products International Ltd.

FPI Fireplace Products International Ltd. (FPI) is a preeminent fireplace, insert and freestanding stove manufacturer in North America. Headquartered just outside of Vancouver, British Columbia, FPI distributes Regency, Hampton, Palace and Excalibur brand products throughout the United States, Canada, Mexico, Australia, New Zealand and parts of Europe and Asia. With 26 years of design and manufacturing experience, FPI produces high-quality hearth products that feature an exceptional fire, controllable heat and custom design options.
